FAX: 713-798-0223

Program Name: Baylor College of Medicine

Size of intern class for 2020-2021 recruitment season: 9

Application Process: We review all applications received in ERAS. Each application receives a holistic review by two reviewers.

Number and types of letters of recommendations: We require four letters. Two of these letters must be department chair letters from each respective department, written by the chair or their designee. The remaining two letters are left to the discretion of the applicant.

Application review/invite timeline: We expect to begin offering interview invitations 2 to 4 weeks after applications are accessible on ERAS. Interviews will continue to be offered on a rolling basis throughout interview season. We anticipate interview days to be offered from the beginning of November through the month of January. We will be conducting all interviews virtually.

Approach to Step 1 and Step 2: A passing Step 1 score is necessary for an interview. A passing Step 2 score is required for ranking, but not required for an interview invitation.

Post-Interview communication policy: We adhere to the NRMP guidelines regarding post-interview communication of not sending individualized communication to applicants after the interview day. Applicants are welcome to reach out to any resident, faculty member or our program coordinator to request additional information.

Contact information: Cindy Patton, program coordinator, 713-798-0104 or cpatton@bcm.edu
