

Program Name: University of Nebraska Medical Center

Size of intern class: 4

Application Process: We will review the whole application when ERAS opens. We will extend only enough invites as we can so as not to invite candidates without a spot for them to interview.

Number and types of letters of recommendations: 3 (one should be a chair letter). We want letters from faculty who know you well and know your work clinically. Preference for med-peds, internal medicine and pediatric faculty, but this is only a suggestion and not a rule.

Application review/invite timeline: We will start reviewing applications on October 21, 2020. We have a rolling invitation process and may invite people throughout the interview season. We plan on interviewing from early November through January.

Approach to Step 1: Preference given to those who have passed Step 1 on first attempt. Ideally >200-210, but we take a holistic approach to the application.

Approach to Step 2: Should be taken and at least pending by the time rank lists are due.

Post-Interview Communication Policy: We do not participate in post-interview communication and do not expect post-interview communication from the candidate. It plays no part in our rank list.
