

## NMPRA website information

Program Name: University of Illinois College of Medicine at Peoria Med-Peds

Size of Intern Class: 8

Application Process: ERAS

Number and Types of Letter of Rec: 3, recommend one chair letter but not required if not available. No other letter restrictions or requirements

Application Review/invite timeline: review begins as soon as ERAS opens, interviews begin the first week of November and continue through end of December/early January depending on number of applicants

Approach to Step 1: no minimum to apply, review each applicant on a case by case basis. Failure does not preclude application, as many life events and external factors can contribute to failure of a test that is offered one time only. Encourage anyone interested in Med-Peds to apply and the entirety of the packet will be reviewed.

Approach to Step 2: no minimum to apply, see Step 1. We will not rank an applicant if Step 2 is not completed prior to rank list submission, but will offer an interview if the remainder of the application is present

Post-interview communication policy: We do not communicate after the interview day has occurred. We will answer any questions that you have and always encourage students to reach back to us with any questions or concerns. However, we have found with our own students here at UICOMP that post-interview communication is often confusing, and slanted towards the programs, imparting a false sense often unintentionally on the part of the programs. We welcome any and all questions, but we will not reach back from our program to an applicant after interview day with unsolicited communication.
